This Article-in-Press has been withdrawn at the request of the Editors-in-Chief.

Members of the scientific community raised concerns about this Article-in-Press following its posting online. The concerns encompassed.

- Inappropriate citation of references.
- Inappropriate design of methodology.
- Errors, misrepresentation, and lack of factual support for the conclusions.
- Failure to recognise and cite disconfirming evidence.

The concerns were shared with the authors, who prepared a response and submitted a revised manuscript for consideration by the journal. In consideration of the extent of the concerns raised and the responses from the authors, the journal sent the revised manuscript to two independent peer-reviewers. The peer-reviewers concluded that the revised manuscript did not sufficiently address the concerns raised by the community and that it was not suitable for publication in the journal. The authors disagree with this withdrawal and dispute the grounds for it.

The full Elsevier Policy on Article Withdrawal can be found at https://www.elsevier.com/about/policies/article-withdrawal.
